

Managed Detection and Response (MDR)

Real-time detections and response

Any data, anywhere

- Leverage cloud or on-premise infrastructure, SaaS applications, or other sensors and endpoints, to quickly detect and respond to attacks
- State-of-the art data processing and analytics from QOMPLX Data Factory for Cyber enables ingestion of all types of data and incorporates all types of security tools
- QOMPLX CYBER SaaS suite provides patented, automatic, real-time detections with minimal false positives, and our 24x7 security monitoring fills in the gaps that only human experts can.

Massive flexibility and powerful processing

Clear signals are the cornerstone of reliable insights.

- The QOMPLX MDR team of experts employ the continuous analytic engine from our data factory and the QOMPLX CYBER SaaS suite: Identity Assurance, Privilege Assurance, and Q:SCAN
- This combination of QOMPLX expertise with any existing tools creates a holistic understanding of your network including your visible attack surface, true authentication of users in your network, and management of appropriate user privileges.

Detection	
Intelligence-fed threat hunting	Our analysts hunt for threats using a variety of intelligence sources including the Indicators of Compromise (IOCs) and reports provided by our QOMPLX CYBER intelligence team.
Custom detection rules	We know that each client environment is different, that's why we develop custom rules based on your unique operational needs.
Data source ingestion	Bring what you have, we will integrate with the security controls that you currently have in place.
Enriched alerting	We investigate and provide additional details on alerts using our enrichment datasets and expertise.
Investigation	
QOMPLX Managed Assurance	Get the most out of the QOMPLX CYBER platform with our team of specialized analysts.
Correlated analysis	We correlate activity and events across all sources to deliver tailored analysis.
Alert prioritization	We prioritize alerts and call your attention to those that require immediate analysis & response based on the impact to your specific business requirements.
Detailed results	Our analysts provide detailed investigation reports with results and recommendations for improvement.

Insight-powered answers and responses

- QOMPLX MDR relies on powerful software, impressive flexibility, and expert response to provide a world class, cost efficient MDR experience
- Gain agility with our SOC that enhances existing solutions and powers a better overall cybersecurity response

Response	
Validation and notification	QOMPLX analysts execute custom incident response plans upon confirmation of an incident.
Remote response	We work with available solutions and client personnel to drive responses to completion.
Containment and remediation actions	We work with your team to contain attacks and execute any remediation/mitigation activities.
Incident response experts ¹	Activate incident response services as needed.
Collaboration	
Phone/Slack/email	Easily access SOC Analysts through multiple channels.
Visibility	Obtain the same view that our analysts utilize through the QOMPLX CYBER platform.
Custom incident response plans	Custom-developed incident response plans and documentation are provided at onboarding. Utilize our playbook library or your existing plans.
Extended team	We seamlessly integrate with your team and operational cadence to provide regular updates and check-ins so you are always informed.

¹ Additional Incident Response Professional Services may be provided via executed retainer agreement.

Reporting	
Metric-driven dashboard	Easy-to use activities and performance dashboards display identification of incidents, alerts, responses, and action taken.
Attack surface monitoring	Q:SCAN delivery is integrated in QOMPLX MDR services
Security improvement and resilience recommendations	We provide ongoing recommendations to improve security and resilience of your environment
Intelligence and threat advisories	Receive early access to our threat and intelligence advisories which contain bad actor and threat scenarios alerts.
Custom reporting per incident	Detailed reporting tailored to your business needs.

Why QOMPLX®

QOMPLX harnesses data to provide unified visibility into cyber risks and trust in identity. QOMPLX solutions reduce cyber risk and attack surfaces by mapping exposures and performing real-time detection of attacks. This approach increases network observability by closing the largest remaining gaps in cybersecurity: identity verification, cross-tool data fusion, and data interoperability. QOMPLX defends some of the world's most renowned brands by re-establishing trust for client organizations, assuring authentication, and enabling confident security decisions.
