

# ZeroFox External Cybersecurity Platform

Protect your external digital assets and data from threats at the scale and speed of the internet.

## Protecting You Beyond the Perimeter

Many of today's digital platforms are largely ungoverned, unmonitored and unprotected across the vast public attack surface. The ZeroFox Platform allows security teams to expand protection beyond their perimeter to comprehensively secure their entire attack surface and safeguard against digital threats permeating social media, surface web, and deep/dark web channels.

ZeroFox can help you to outsmart bad actors at every turn. Using a vast set of data sources, powerful AI-driven analysis, and a team of expert threat researchers, the ZeroFox Platform automatically identifies targeted phishing attacks, credential compromise, data theft, impersonations, brand hijacking and whatever else the web throws at you. Additionally, ZeroFox instantly alerts security teams and authorities at the first sign of attack and automatically takes swift actions ranging from taking down malicious content to dismantling attacker infrastructure.

## Immediate Time To Value

### Expand Visibility Over External Digital Threats

Leverage AI-driven technologies and comprehensive global intelligence collection to immediately identify, remediate, and mitigate threats before they compromise your network.

### Combine Expertise with Integrated Threat Hunting

Enrich traditional security programs with analyst-curated threat intelligence and conduct deep-dive investigations tapping petabytes of unique threat intelligence data lakes.

### Remediate Threats and Disrupt Attacks at Scale

Significantly reduce time spent identifying, investigating and mitigating threats via automated remediation, integrated takedowns and proactive disruption actions.

## Comprehensive Digital Risk Protection

### Managed Protection

Protect your brand, executives, domains and data against phishing, impersonations and credential theft.

### Full-Spectrum Threat Intelligence

Access finished and actionable intelligence at a global scale, curated for you by our team of 200+ threat analysts.

### Adversary Disruption

Dismantle attacker infrastructure to remediate threats quickly and prevent your organization from becoming the next target.

## Digital Risk Protection Solutions

### Brand Protection

Protect your digital presence, owned assets and accounts, logos and trademarks against account hacking, impersonations, malicious content and reputation damage.

### Web & Domain Protection

Protect your owned domains/subdomains through continuous identification and remediation of impersonating domains, trademark infringement, and spoofing.

### Deep & Dark Web Protection

Gain visibility into dark web forums to uncover data leakage, compromised credentials and attack chatter.

### Executive Protection & VIP Security

Protect executives against account takeovers, impersonations and targeted attacks and minimize physical security risks.

### Attack Surface & Vulnerability Protection

Proactively identify, assess, and alert for risky external security vulnerabilities that exist outside the firewall.

### Product & Counterfeit Protection

Protect your products against counterfeits, unauthorized use or resale, impersonations and reputation damage.

### Location & Event Protection

Protect location assets, such as headquarters, manufacturing facilities, etc., from cyber and physical threats with real-time situational awareness.

### Remote Workplace Protection

Provide protection across email, collaboration tools and video conferencing to stop threats targeting your employees, customers and partners.

*ZeroFox delivers Full-Spectrum Threat Intelligence, continuously collecting intelligence from digital platforms across the globe.*

## Full Spectrum Threat Intelligence

### Dark Web Intelligence

Access deep and dark web data that helps you identify exposed or stolen credentials, PII, IP, and more before it's weaponized and directed at your organization.

### Brand Intelligence

Identify fraudulent domains, executive impersonations, phishing and other risks across the public attack surface that put your brand at risk.

### Fraud Intelligence

Find data sets, websites, tools, fraud specialists and their TTPs, and social engineering methods aimed at undermining your business and clients.

### Internet Infrastructure Intelligence

Distinguish between legitimate and suspicious providers for domains and hosting/VPS infrastructure. Find current infrastructure exploits and TTPs, suspicious hosts, IPs and domains used in attacks.

### Malware & Ransomware Intelligence

Quickly track down malware, adversaries and TTPs being used to gain access, escalate, exfiltrate and ransom your organization.

### Vulnerability Intelligence

Track the latest vulnerabilities being released publicly by vendors. Monitor vulnerabilities and exploits being prioritized by the security research and adversary communities.

### Physical Security Intelligence

Monitor events or policies affecting specific geographic areas of operation or specific executives. Track TTPs affecting cybersecurity and physical posture.

### Geopolitical Intelligence

Gain contextual insight into political strife, pandemic status and health issues, terror risks, refugee displacement and related topics in different geographies

### Third Party Intelligence

Gain contextual insight into political strife, pandemic status and health issues, terror risks, refugee displacement and related topics in different geographies.

### Strategic Intelligence

Track geopolitical events, social, health, and economic indicators to inform long-term decision-making.

## Automated Takedowns & Adversary Disruption

Resolve security incidents and disrupt adversaries quickly. Take down fraudulent content, accounts and sites across thousands of networks and block access to adversary infrastructure. ZeroFox executes hundreds of disruption actions upon every validated threat leveraging our Global Disruption Network of partner ISPs, Hosts, Registrars, CDNs, Telcos and more - who take immediate action to halt attacks in their tracks.
