Why work for e92plus? We're an ambitious, growing company that offers fantastic opportunities to learn, develop and build a successful career and unlimited potential that's not restrained by age or experience, only ability and results. Everyone benefits from continual training and development, plus we're a social company - with company events for both our employees and with partners, from our annual company kick off in Barcelona to football tournaments.

Location	This role will be based in e92plus Argent Court, Hook Rise South, Surbiton, KT6 7NL

Web Designer / Developer

e92plus

The opportunity	e92plus are looking a creative, ambitious Web Designer / Developer to join our growing Development Team. We're delivering innovative projects for our vendors and partners, working with the marketing team to build exciting new services as part of our portfolio. You'll be delivering engaging content and design for an award-winning company in the cybersecurity world.
What you'll do	You'll be supporting the team on projects, as well as being given the opportunity to take the lead on your tasks. The role includes design of new materials (from landing pages to whitepapers, and social media images and videos), as well as web application development.
What does a successful candidate look like?	Creative, proactive and focused. We're looking for someone who can introduce new ideas and helping implement the creative strategy – but with a clear focus on how the team can deliver results to support the rest of the business. The successful candidate will have a track record on delivery on time, with a clear focus on meeting objectives and work that helps produce successful business outcome. **Key activities with the role include:** ■ Administration of the company website ■ Creation and administration of additional micro-sites and landing pages for supporting products ■ Design support for emails ■ Creating printed marketing material that complement digital/online editions ■ Supporting the Development Team on in-house web applications **Experience / knowledge that's required includes:** ■ HTML, including CSS, jQuery & Javascript ■ Adobe suite, in particular XD, Photoshop and illustrator ■ Source control (such as Bitbucket) ■ Working on UX/UI projects It would be an advantage to have worked with the Microsoft technology stack, including MVC, C#, Razor pages. In addition, it would be good to have worked with Google Analytics. Part of the recruitment process will include demonstrating your portfolio, talking through your process and the work you've delivered (either in-house or for customers).
Team Engagement	You'll work closely day to day with the rest of the e92plus dev team, helping to implement development project's as well as working with other departments in the company. e92plus have an interactive, team-based culture that encourages everyone to be part of the company, and the Development Team help support and work with functions across the entire company, so a strong team ethic and collaboration skills are key.
Development	The role will be supporting the Lead Designer, and includes continual training/code reviews and personal development, with excellent opportunities for career progression with the e92plus team to a more senior role.
Targets/KPI's	Targets will be based on KPIs, including completing assigned tasks and managing projects.
